

Perennial Production Internship

OVERVIEW

Our goal is to give our interns responsibilities and roles which will prepare them to enter the workforce after graduation. You will gain a hands on introduction to perennial production thru working directly with our perennial grower. The perennial production intern will learn various methods of perennial production, including creating a production plan, cultural requirement for growing perennials.

You will be able to participate in the following experiences:

- Networking events
- Volunteering for the community
- Participation in Cultivate'18 – Columbus Ohio
- Regular group meetings

Responsibilities: (not a complete list)

- Identify, prioritize and perform production task specific to the management of perennial crops
- Record perennial production data (work logs)
- Inventory cycle counts
- Attend weekly management meetings

REQUIREMENTS:

Must be a plant inspired individual with a positive attitude, strong work ethic, ability to prioritize and organize your work, love working outdoors, enjoys getting a little physical with the ability to lift between 20 and 40 pounds and will adhere to all safety standards.

Sophomore, junior or senior level student majoring in horticulture or a related field of study.
