

An aerial photograph of a large nursery facility. The nursery is organized into numerous rectangular blocks of plants, with various colors including green, red, and purple. A large, dark, rectangular structure, possibly a greenhouse or covered walkway, is visible in the upper middle section. To the left, a large body of water, likely a lake or reservoir, is visible. To the right, a paved road with a few cars runs parallel to the nursery. The background shows a hazy landscape with more greenery and some buildings.

Parts of a Tree

Directions: Draw a line from the following words to their definitions. Use these words to fill in the parts of a tree (Page 3).

Branch

As part of a tree's crown, these convert energy into food.

Crown

This is a woody structure connected to but not part of the central trunk of a tree.

Leaves

This woody structure supports a tree's crown and gives a tree its strength and shape.

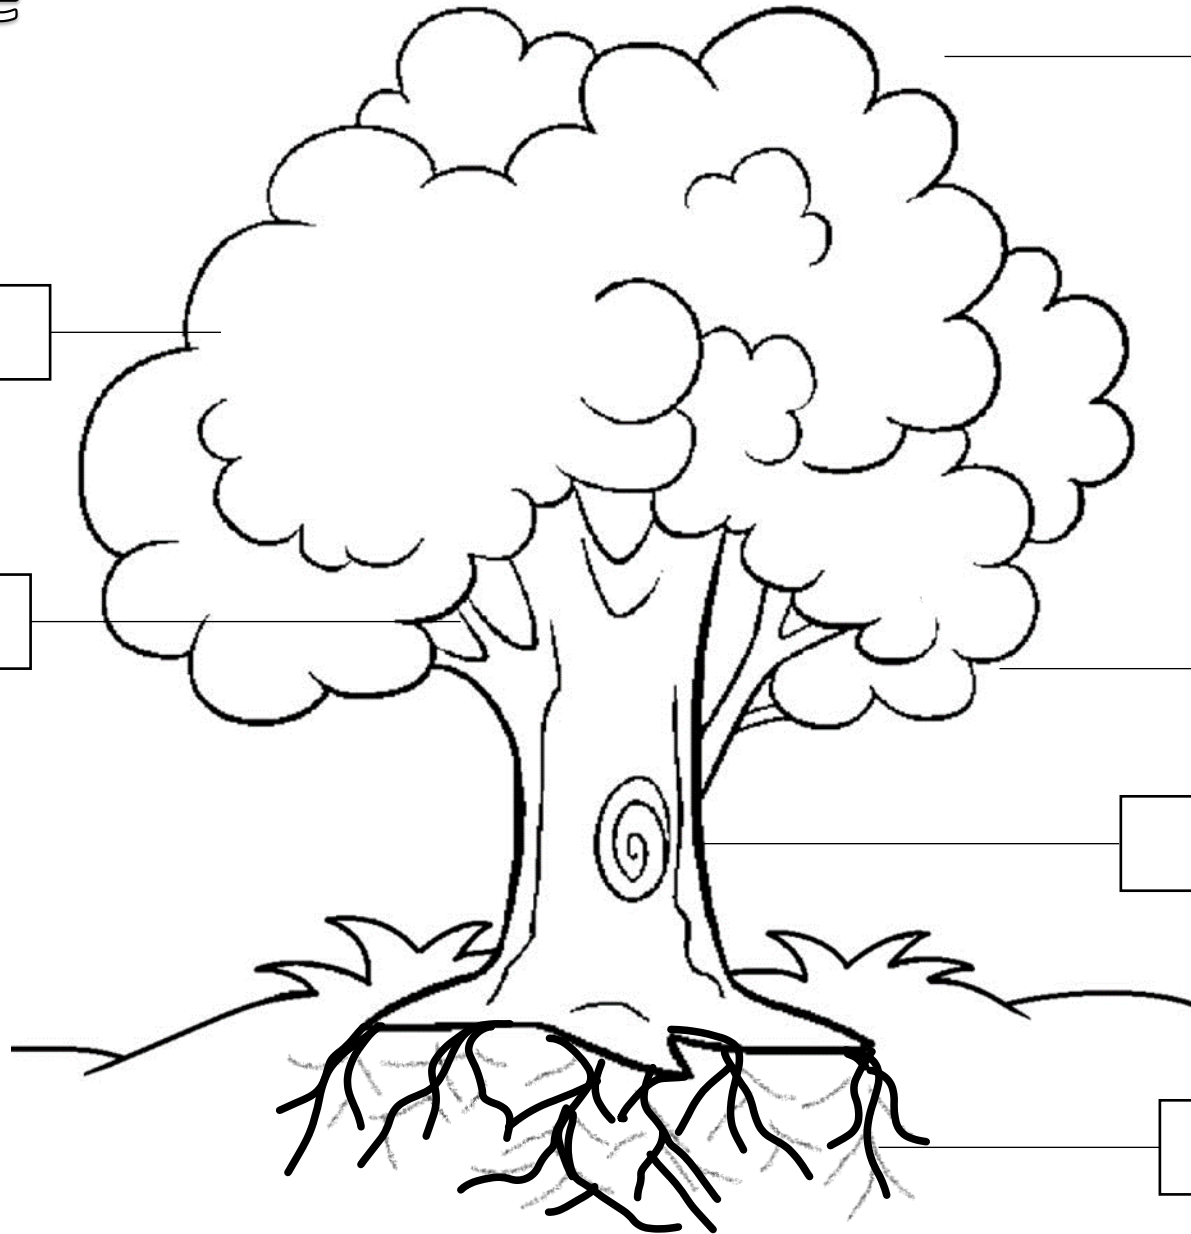

Roots

This is the top part of the tree. It includes branches that grow out from the main trunk and support its leaves.

Trunk

These take up water and nutrients from the soil and anchor the tree to its surroundings.

Draw some of your favorite plants!

Prepare to plant!

Directions: Help your parent select a tree, flower or shrub to add to your yard. Check off the following boxes to learn how to plant your selection. When you are done, draw your new plant in the box below.

Step 1: Check for a safe place to dig.

Step 2: Dig a hole big enough to hold your new plant.

Step 3: Remove casing and carefully break up the plant's roots.

Step 4: Put the plant into the hole you created.

Step 5: Pack dirt around the top of the plant and water it.

Step 6: Read the care directions on the plant tag, and watch your plant grow!

Box 1
